

Intensive skin hydration and face  
firming in just 10 minutes

**ambers beauty studio** are excited to introduce  
this **new** revolutionary treatment from CACI  
International.

Hydratone is the treatment for people with  
busy lives

# CACI Hydratone

Hydratone is a new treatment from CACI International specifically developed for individuals with busy lives that are short on time, and in the need of a treatment that can deliver effective results, within the quickest possible time frame.

The Hydratone procedure *takes just 10 minutes to perform yet provides immediate and intensive skin hydration and face firming.*

Progressive results are achieved through a course of treatments, but for optimum effect the Hydratone treatment works spectacularly when combined with the traditional CACI non surgical lifting technique.\*

Hydratone combines active micro current rollers with a unique, electrically conductive gel mask that has been infused with powerful hydrating properties. (collagen, hyaluronic acid, vitamin C, vitamin E)

HYDRATONE

# CACI Hydratone

The rollers gently massage the face causing the mask to be “charged” so that the whole face is bathed with rejuvenating energy.

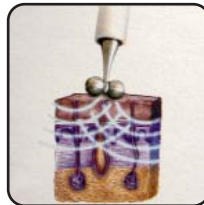

The energy delivered by the rollers recharges and replenishes the bio-electrical energy with the facial muscles and in so doing helps to restore muscle tone and firmness. At the same time, the energy generated also drives the hydrating actives contained within the gel mask into the skin tissue.

De-hydrated and sun damaged skin is immediately quenched by the hydrating action of the mask. The mask’s powerful properties also have a softening action on skin tissue that helps to plump out and smooth deep lines and wrinkles.

After just 10 minutes of Hydratone treatment the face has a remarkably softer, radiant and more youthful appearance.

*\*CACI Non Surgical Facials gently help tighten and tone sagging muscles whilst soothing the appearance of fine lines and wrinkles. CACI works by combining a unique patented waveform with the naturally occurring bio-electric current of the body to achieve instant results.*
